

# Chapter 19: Selection Tool

## Selection Tool

### What it does

Click on a marking to select it, such as a lyric, slur or articulation. Once selected, you can move, nudge, edit or delete it. For more advanced editing, double-click to switch to the appropriate tool. The Selection Tool works on Measures (Measure Tool), Notes (Simple Entry), Smart Shapes, Expressions, Articulations, Repeats, Lyrics, Chords, Text Blocks, Graphics, Brackets, Tuplets, Key and Time Signatures, Clefs, Ossias, Staff and Group Names.

Tip: The Selection Tool uses font annotation to determine where musical markings are. If you’re using a music font not supplied by Coda, you may get better results after annotating the font. See [FONT ANNOTATION DIALOG BOX](#).

### Special mouse clicks

- **To switch to the Selection Tool, press Ctrl-shift-A.**
- **Click to select the item.** If two items overlap, click again to cycle through the overlapping items.
- **Drag a selected item** to move it.
- **Select an item then use the arrow keys** to nudge an item.
- **Select an item and hit backspace** to restore default positioning.
- **Click and press delete, or right-click the handle and select Delete** from the contextual menu to remove them.
- **Double-click an item or press enter with an item selected** to select the item with the appropriate tool.

### Contextual menus

Contextual menus are reached by right mouse-clicking on an object. A contextual menu will be displayed where you can select various items.

Articulations	
Menu item	What it does
Edit Articulation Definition	Display the Articulation Designer dialog box
Delete	Removes selected articulations

Brackets	
Menu item	What it does
Edit Group Attributes	Display Group Attributes dialog box
Delete Bracket	Deletes selected bracket

## Chord Symbols

Menu item	What it does
Edit Chord Definition	Display the Chord Definition dialog box
Edit Fretboard	Display the Fretboard Editor dialog box
Delete	Removes selected chord symbols
Show Chord	Shows (or hides) individual chord symbols
Show Fretboard	Shows (or hides) individual fretboards

[TOC](#)

## Text Expressions

Menu item	What it does
Edit Note/Measure Expression Assignment	Display the Expression Assignment dialog box
Edit Note/Measure Text Expression Definition	Display the Text Expression Designer dialog box
Edit Font	Display the Font dialog box
Delete	Removes selected expressions

[Index](#)
[Next Chapter](#)
[Previous Chapter](#)

## Shape Expressions

Menu item	What it does
Edit Note/Measure Expression Assignment	Display the Expression Assignment dialog box
Edit Note/Measure Shape Expression Definition	Display the Shape Expression Designer dialog box
Edit Note/Measure Shape Expression Graphically	Displays bounding box handles for graphically editing the shape expression
Delete	Removes selected expressions

## Key Signatures

Menu item	What it does
Edit Key Signature	Display the Key Signature dialog box

[TOC](#)

## Lyrics

Menu item	What it does
Align Default	Changes the alignment of the syllables back to Finale's global setting
Align Center	Changes the alignment of the syllables to centered under the note
Align Left	Changes the alignment of the syllables to the left under the note
Align Right	Changes the alignment of the syllables to the right under the note
